Summary

Full-stack developer and technical lead with nine years of experience. I started in WordPress, with more than 200 sites built and maintained, and now build on whatever the project needs: Shopify, Webflow, Next.js, Astro, headless CMS and native mobile apps.

I work remotely with agencies and businesses in the US and Europe, and have led both development teams and a company's IT function: setting technical direction, owning the stack and infrastructure, and getting projects deployed cleanly.

Experience

DLVX | Brussels & Bangkok (Remote)
Head of Information Technology | 01/2024 - Present
WordPress Developer | 04/2021 - 12/2023

- **Technology Leadership:** Lead technology at DLVX, a studio building websites, apps, automations and AI workflows for brands. Set technical direction and run day-to-day IT operations across the organisation.
- **Stack, Infrastructure & Security:** Own the stack, internal tools, infrastructure and security so client work stays maintainable long after launch.
- **Platforms & Internal Tools:** Plan, build and maintain the studio's platforms and internal tools.
- **Vendors & Developers:** Coordinate vendors and developers so delivery stays predictable and secure.

Independent | Worldwide (Freelance)
Full-Stack Developer | 2017 - Present

- **WordPress at Scale:** 200+ WordPress websites built and maintained for agencies and business owners in the US and Europe, several for seven years running, including complex Elementor Pro and Crocoblock / JetEngine builds.
- **Commerce & Headless Builds:** Shopify, Webflow and headless builds with Next.js, Astro, Payload and Sanity, chosen to fit each project.
- **Mobile & Automation:** Native mobile apps in Kotlin and Swift, and automation with n8n and Make.

Herospace | San Antonio, TX (Remote)
Senior WordPress Developer | 01/2023 - Present
WordPress Developer | 05/2021 - 12/2022

- **Custom Themes from Design Files:** Build custom WordPress themes and functionality for the agency's clients, taking each site from design file to launch.
- **Performance & Long-Term Support:** Look after performance, SEO foundations and long-term maintainability so sites stay healthy after launch.

BlueSoft LLC | Arizona (Remote)
WordPress Developer | 05/2021 - 06/2022

- **Client Delivery:** Delivered WordPress builds and ongoing support for client projects.

Moladev | London, UK (Remote)
Technical Lead | 04/2021 - 03/2022

- **Technical Development:** Ran the technical side of the agency's digital projects: assigning work, unblocking developers and getting each site deployed cleanly.
- **Debugging & Deployment:** Oversaw debugging, technical operations and deployment.
- **Team Coordination:** Coordinated developers, tasks and workflows so projects moved on time.

PT. Multi Data Sistem | Jakarta, Indonesia
Founder & Technical Lead | 03/2019 - 05/2021

- **Paperless HR for Wärtsilä Indonesia:** Led delivery of a custom HR management system for the Indonesian arm of a multinational, replacing paper forms and manual approvals with one platform (Laravel, CodeIgniter, MySQL).
- **Attendance-to-Cloud Sync:** Synced on-site attendance machines to a cloud server, so attendance lives in one place.
- **Tiered Approvals & Reports:** Built a tiered overtime and leave approval workflow with automated reporting.
- **Electronic Signatures:** Integrated DocuSign into the HR platform so agreements are signed and tracked without printing a page.
- **Mobile Policy App:** Built a Flutter app end to end that puts company policies and regulations on every employee's phone, searchable and up to date.
- **Digital Documents:** Introduced digital document management that removed shipment delays and cut operating costs.

Wirecard | Jakarta, Indonesia
Java Developer (Intern) | 05/2018 - 10/2018

- **Internal Project Management System:** Built an internal system for documentation, project setup, cost management and employee attendance.
- **Struts 2 & Hibernate:** Developed screens, controllers and models with Struts 2 and Hibernate.
- **Planning & Documentation:** Planned timelines and tasks in JIRA; wrote the user guide and application report.
